

Lakeside Engineering Product Datasheet

■ Lakeside Engineering

Manufacturing high quality boat hoists and other lakeside products for boats of all sizes.

■ Hoist Services

We take care of installation, removal, cover installation, and maintenance. Your investment will always be well taken care of.

■ Barge Services

Our on water cranes can be for more than just installation and removal, such as emergency boat extractions and recoveries. Being the first barge service on Lake Oko-boji, you can be assured of our experience.

■ Customer Service

One call for Sales, Service, and Installation. Make emergency service calls 24 hours a day all Spring and Summer.

Blue Water Hoists—meeting your boating needs!

Danbom has been in the Dock business for over 40 years. We are the longest running full service lake business in the Oko-boji area.

Danbom's first boat hoist was manufactured in 1969. After that, we manufactured many different models of boat hoists, including the world's first and largest portable freestanding boat hoists. Other industry firsts include the first deep keel sailboat hoists, portable freestanding saltwater lifts, and many others. With all of these establishments, we continue to raise the bar for competition and guarantee long lasting products with our Blue Water Boat Hoists.

Some of the benefits with Blue Water Hoists include the use of our cantilever, instead of a vertical, lifting system. Blue Water Hoists drop back to deeper water and do not use complicated cabling systems. We believe in simplicity; low maintenance hoists keep your costs at a minimum.

When ordering a boat hoist from Blue Water Hoists, many options are available. Galvanizing provides rust proof top frames, which is done on every model. Completely galvanized hoists are available, as well as painted. Canopy options, such as length, width, and color are also available. For complete canopy options, contact Danbom Lakeside Engineering.

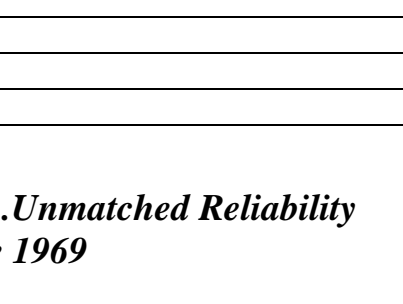

Blue Water Hoists also feature our superior carpeted bunk systems to properly support your boat when it's not in use. A great alternative replacing the foam centering devices and wooden cradle brackets. Both systems are currently still available.

Quality service is never put on hold with our willingness to provide assistance 24 hours per day. We want to help you protect your boat investment.

Unmatched Experience

Hoist Specifications - Custom Applications are available upon inquiry.

Hoist Specifications	BW 1078 PWC Hoist	
Lifting Capacity:	1000 lbs	
Maximum Boat Length:	16 ft.	
Maximum Beam:	70"	
Lifting Height:	4 ft.	
Distance Between Uprights:	78"	
Cradle Supports:	3	
Options:	Hot Dip Galvanizing	
Winches:	Manual or Electric	
Hoist Specifications	BW S/S Double PWC Hoist	
Lifting Capacity:	1000 lbs per side	
Maximum Boat Length:	16 ft.	
Maximum Beam:	60" per side	
Lifting Height:	4 ft.	
Distance Between Uprights:	134"	
Cradle Supports:	2	
Endless Options:	Call for more information	
Cradle:	100% dependent, raise or lower jet ski one at a time	
Features:	Catwalk all 3 sides of the hoist	
Winches:	Manual or Electric, remote control option	
Hoist Specifications	BW 5000	
Lifting Capacity:	5000 lbs	
Maximum Boat Length:	24 ft.	
Maximum Beam:	102"	
Lifting Height:	5 ft.	
Distance Between Uprights:	118"	
Cradle Supports:	3	
Motor:	1/2 HP Electric Motor	
Options:	Painted or Hot Dip Galvanizing	
Hoist Specifications	BW 7000	
Lifting Capacity:	7000 lbs	
Maximum Boat Length:	28 ft.	
Maximum Beam:	120"	
Lifting Height:	5.5 ft.	
Distance Between Uprights:	128"	
Cradle Supports:	4	
Motor:	1 HP Electric Motor	
Options:	Painted or Hot Dip Galvanizing
