

Lakeside Engineering Product Datasheet

■ Lakeside Engineering

Manufacturing the best built aluminum sectional docks and plank docks in the entire Lakes Area.

■ Dock Services

We take care of installation and removal. At your request, we may also provide customized layouts. Your investment will always be well taken care of.

■ Crews

Our large group of dock builders includes 2 (3) man crews on our dock barges. Several individual builders make for timely installation and removal. Always prepared for emergency dock services and/or repairs.

■ Customer Service

One call for Sales, Service, and Installation. Make emergency service calls 24 hours a day all Spring and Summer.

Blue Water Docks—meeting your boating needs!

Danbom has been in the Dock business for over 40 years. We are the longest running lake service business in the Okoboji area.

Jerry Danbom began building docks as a kid, and his passion evolved into a well developed business. Danbom's first boat hoist was manufactured in 1969. Other industry firsts include the first deep keel sailboat hoists, portable free-standing saltwater lifts, and many others. With all of these establishments, we continue to raise the bar for competition and guarantee long lasting products with our Blue Water Docks.

Some of the features and benefits with Blue Water Docks include a seven year warranty on decking, resistance to heat and cold, and a no-slip surface. Blue Water Docks are built with heavy duty construction, which utilizes 4X4 wood posts driven into the lakebed and 2X4 braces driven in the lakebed on every section, for long lasting durability. We believe in simplicity; maintenance free docks keep your costs at a minimum.

When ordering a dock from Blue Water Docks, many options are also available. White vinyl sleeves may be added to the posts to finish the look. Other accessories are also available, such as benches, lighting, bumpers, and a cat-walk. We provide you with the ability to customize your dock to fit your taste. For complete options, contact Danbom Lakeside Engineering.

Blue Water Docks also provides customized installations, permanent installations, and seasonal installation and removal to accommodate your needs.

Quality service is never put on hold with our willingness to provide assistance 24 hours per day. We want to help you protect your boat investment.

Superior Strength and Durability
